

# OSBORNE REFRIGERATORS

The Osborne **eColdN** range...  
...saving pounds and the planet.

The next generation of *eCold* storage cabinets from Osborne Refrigerators is designed to be even better for your pocket as well as the environment. Low-voltage fans and LED lighting put almost no waste heat into the cabinet, and increased insulation, door switches on the internal fans and efficient compressors all maximise cooling performance while using less energy. *eColdN* cabinets are also designed to be virtually maintenance-free, with no fluorescent tubes to change, and condensers that never require unblocking.

Osborne Refrigerators Ltd have been manufacturing at our Bognor Regis factory for more than 50 years and we are the leading British manufacturer of refrigerators designed for the chilling and storage of cold beverages, wine and foodstuffs. As well as our standard range of cabinets, which are specified by leading breweries, drinks manufacturers and leisure companies across the world, this also includes a range of high quality cabinets designed specifically for milk storage.

All our refrigerators use CFC free polystyrene insulation and can be efficiently recycled at the end of their life. They are also available with a choice of refrigerants.

The Osborne range is always evolving, due to our commitment to constantly improve our products and also in response to specific customer requirements. We have built an enviable reputation for the quality and reliability of our refrigerators and we will never stop working to maintain that reputation.

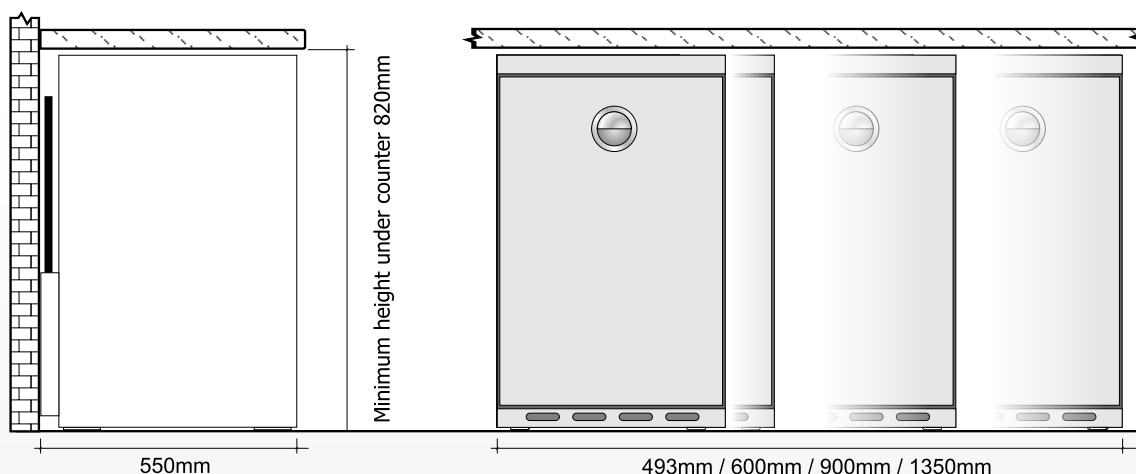

## Details

Our reduced height (805mm) *eColdN* catering cabinets are available in four different widths, from 493mm to 1350mm. They are designed primarily for the storage of bottled beverages and foodstuffs. Manufactured from stainless steel, with a stainless steel interior. Refrigerator interiors are fan assisted for enhanced chilling and the maintenance-free condenser is fan-cooled for increased efficiency. Refrigerator models feature automatic defrost. Freezers use cold-wall cooling and are manual defrost. Insulation is environmentally friendly polystyrene and the refrigerant is R600a hydrocarbon. Standard solid doors are hinged and lockable. All sizes are also available as an ambient storage cupboard to match.

## Features

### Refrigerator Models

- Fan assisted evaporator for rapid cooling
- Fan assisted, maintenance-free condenser for efficient performance
- Automatic defrost and re-evaporation
- Evaporator fan cut-out door switch

### Freezer Models

- Static cold-wall cooling
- Manual defrost

### All Models

- LED lighting & low voltage fans
- Locking hinged doors
- Stainless steel exterior and interior

### Options

- Castors (add 120mm to height)
- Aluminium interior
