

OSBORNE REFRIGERATORS

Pass-through Chiller Range

The Osborne **eCold** range... ...saving pounds and the planet.

The *eCold* range from Osborne Refrigerators is designed to be good to your pocket as well as the environment. Low-voltage fans and LED lighting put very little waste heat into the cabinet and improved insulation and efficient compressors maximise cooling performance while using less energy. *eCold* cabinets are also designed to be virtually maintenance-free, with no fluorescent tubes to change, and condensers that never require unblocking.

Osborne Refrigerators Ltd were established in West Sussex more than 50 years ago and we are the leading British manufacturer of refrigerators designed for the display and storage of wine and cold beverages. As well as our display cabinets, which are specified by leading breweries, drinks manufacturers and leisure companies across the world, we also manufacture stainless steel solid door catering chillers and a range of specialist milk cabinets.

All our refrigerators use hydrocarbon refrigerant (alternatives available for some models), CFC free polystyrene insulation and can be efficiently recycled at the end of their life.

The Osborne product range is always evolving, due to our commitment to continuous improvement and also in response to specific customer requirements. We have built an enviable reputation for the quality and reliability of our refrigerators and we will never stop working to maintain that reputation.

Details

Pass-through *eCold* cabinets are available in four sizes and can be used in island bars, for back-filled sites or, in the case of the 125P, in till areas to encourage impulse sales. Designed primarily for the storage and display of bottled beverages, these cabinets are also suitable for foodstuffs. They are manufactured from rust resistant zinc-coated steel with a hard wearing powder-coat finish, or from brushed stainless steel. The standard painted finishes are black and silver but other RAL and Pantone colour finishes are available to special order. The interior is stucco aluminium or stainless steel. The interior is fan assisted for consistent chilling performance and the maintenance-free condenser is fan-cooled for increased efficiency. The doors are double glazed, hinged and lockable (not 125P). Solid doors are available as an option for all models. A top mounted lightbox is also available, great for product branding.

Cabinet Specifications

Features

- Fan assisted evaporator for rapid cooling
- Fan assisted, maintenance-free condenser
- Automatic defrost and re-evaporation
- Digital temperature controller
- LED lighting gives excellent product display
- Double glazed doors (lockable on 276E models & 7050)

Options

- Solid door(s)
- Choice of black or silver painted exterior
- Other colours to special order
- Stainless steel exterior and/or interior
- Stainless steel doorframes/solid doors
- 14 - 16°C temp range for red wine
- Topmounted lightbox (adds 180mm to height)
- Fixed glass panel (276E models only)
- Sliding doors to front OR rear, not both (276E models only)
- R134a refrigerant, 60Hz electrics to special order
